

Metroflow Fintech & Marketplace Expansion Specifications

Document Purpose:

This document outlines the functional, technical, and commercial specifications for three high-value revenue features designed to evolve Metroflow into a full financial and talent operating platform:

1. **Metroflow Pay (Contractor & Team Payouts)**
 2. **Metroflow Virtual Cards (Expense Management)**
 3. **Talent Cloud (Marketplace – Phase Future)**
-

1. Metroflow Pay – Contractor & Team Payouts

1.1 Executive Summary

Metroflow Pay transforms Metroflow from a task management tool into a **financial operating system for businesses**.

It enables organizations to fund a central wallet and seamlessly pay employees, contractors, and freelancers.

Payments can be triggered by:

- **Task Completion (Bounties)**
 - **Scheduled Payroll (Weekly / Monthly / Custom)**
-

1.2 User Journey

Business Onboarding

1. Business Admin completes **KYB (Know Your Business)**.
2. Admin links a business bank account.

3. Admin funds the **Metroflow Wallet**.

User Onboarding

1. Team members or contractors link:
 - Bank account **or**
 - Debit card
 2. User becomes eligible for payouts.
-

1.3 Payment Modes

Mode A: Task-Based Payments (Bounties)

1. Project Manager attaches a bounty to a task
(*Example: "Bounty: ~~₦~~150,000"*).
 2. Task is completed and submitted.
 3. Admin or PM approves the task.
 4. Funds are released instantly from escrow to the user.
-

Mode B: Recurring Payroll

1. Admin assigns a salary or rate to a user
(*Example: ~~₦~~500,000 per month*).
2. Admin selects payment frequency:
 - Weekly
 - Bi-weekly
 - Monthly
 - Yearly
 - Custom (e.g., "Every 2nd Friday")

3. System schedules automatic payouts.
 4. On payday, funds are deducted from the Business Wallet and sent to the user.
-

1.4 Core Features

- **Metroflow Wallet**
 - Central business wallet for funding payouts
 - Pre-funded to guarantee payment execution
- **Smart Escrow System**
 - Funds are locked when a task starts or is assigned
 - Ensures guaranteed payment upon approval
- **Recurring Payroll Engine**
 - Fixed salaries or hourly rates
 - Flexible schedules (weekly to custom)
 - Auto-run if wallet balance is sufficient
- **Bulk Payroll Actions**
 - Example: “Pay all approved tasks in Sprint 4”
 - Reduces admin workload
- **Single Currency (Phase 1)**
 - Wallet funding: **NGN**
 - Payouts: **NGN only**
- **Tax & Compliance (Phase 2)**
 - Auto-generation of relevant local tax documents
 - Exportable reports for accounting

1.5 Revenue Model

- **Transaction Fee**
 - 1.5% + ~~N~~50 per payout
 - Fee cap: ~~N~~2,000 for large salaries
- **Payroll Subscription**
 - “Pro Payroll” automation plan
 - ~~N~~5,000 per month
- **Instant Payout Fee**
 - Optional instant debit card payout
 - 1% additional fee
- **FX Fees**
 - Not applicable (NGN-only in Phase 1)

2. Metroflow Virtual Cards – Expense Management

2.1 Executive Summary

Metroflow Virtual Cards allow teams to spend securely **without sharing physical corporate cards**.

Each virtual card is tied directly to a **Project or Epic budget**, ensuring:

- Zero overspending
- Automatic reconciliation
- Full spend visibility

2.2 User Journey

1. Budget Setup

- Admin defines a project or epic budget
(Example: "Q4 Marketing Campaign – \$5,000,000")

2. Card Issuance

- Admin creates a virtual card
- Card is named and linked to the budget
(Example: "Marketing Ads Card")

3. Spending

- Card is used for online payments (e.g., Google Ads)

4. Real-Time Tracking

- Transaction appears instantly under the linked Epic

5. Receipt Collection

- User is notified via Slack or Email
- Receipt upload is requested

6. Auto-Enforcement

- When budget reaches \$0, card automatically declines

2.3 Core Features

● Project-Scoped Virtual Cards

- Card limits dynamically adjust based on remaining budget

● Merchant Category Locking

- Restrict cards to specific categories:
 - Software
 - Marketing

- Travel
 - Cloud services
 - **Single-Use (Burner) Cards**
 - One-time vendor payments
 - Reduced fraud exposure
 - **Subscription Management Dashboard**
 - View all recurring SaaS charges
 - Identify unused or duplicate subscriptions
 - **Real-Time Spend Visibility**
 - Instant transaction logging
 - Automatic expense categorization
-

2.4 Revenue Model

- **Interchange Revenue**
 - Metroflow retains ~70–90% of interchange fees
 - Average interchange: 1% – 1.5%
 - **Example:**
 - Monthly spend: ₦150,000,000
 - Revenue to Metroflow: ~₦1,500,000 per month (high-margin)
 - **Expense Management Subscription**
 - Advanced reporting & controls
 - ₦29/month per business
-
-

3. Strategic Value Summary

Feature	Business Value	Revenue Impact
Metroflow Pay	Payroll + contractor automation	High transaction + subscription revenue
Virtual Cards	Controlled spending & visibility	High-margin interchange income
