Account Lookup

This API allows you lookup/confirm the account name of the recipient you intend to credit. This should be done before initiating the transfer.

This API allows you confirm Account Name to be transferred to.

<mark style="color:green;">`POST`</mark>

`https://sandbox-api-d.squadco.com/payout/account/lookup`

Request Body

Name	Type	Description
bank_code	String	Unique NIP code that identifies a bank.
account_number	String	Account number you want to transfer to

Sample Request

...

```
{
  "bank_code":"000013",
  "account_number":"0123456789"
}
```

{% hint style="info" %}

Be sure to use a real account number as this service does a live lookup even on the sandbox environment

{% endhint %}

Sample Response

...

```
{
  "status": 200,
  "success": true,
  "message": "Success",
  "data": {
    "account_name": "JENNY SQUAD",
    "account_number": "0123456789"
  }
}
```

Fund Transfer

This API allows you to transfer funds from your Squad Wallet to the account you have looked up.\

Please be informed that we will not be held liable for mistake in transferring to a wrong account or an account that wasn't looked up.\

\

****Transaction Reference:****\

Transaction Reference used to initiate a transfer must be unique per transfer. Kindly ensure that you append your merchant ID to the transaction Reference you are creating. This is compulsory as it will throw an error if you don't append it.\

\

****For instance:****\

\

If my Squad Merchant ID is SBABCKDY and i want to create a transaction ref for my transfer, then I will have something like:\

\

"transaction_reference":"SBABCKDY_12345".

ERROR CODE

These are the various error codes that you might get on the transfer API and the one you should re-query

200 -- Success: \
400 --- Bad request \
422 --- Unprocessed\
424 --- Timeout/failed --- **Should re-query**\
404 --- Not found\
412 ---- reversed

<mark style="color:green;">`POST`</mark>
`https://sandbox-api-d.squadco.com/payout/transfer`

This is for the movement of funds from Squad Dashboard to any bank account

Request Body

Name	Type	Description
transaction_reference<mark style="color:red;">`*`</mark>	String	Unique Transaction Reference used to initiate a transfer. Please ensure that you append your merchant ID to the transaction Reference you are creating. This is compulsory as it will throw an error if you don't append it.

Re-query Transfer

This API allows you re-query the status of a transfer made to know if it was successful, failed, reversed or pending.\

This API allows you re-query the status of a transfer

<mark style="color:green;">`POST`</mark>
`https://sandbox-api-d.squadco.com/payout/requery`

Request Body

Name	Type	Description
------	------	-------------

--	--	--

----- -----		
---------------	--	--

-------	--	--

transaction_reference<mark style="color:red;">`*`</mark> String		Unique Transaction Reference used to initiate a transfer. Please ensure that you append your merchant ID to the transaction Reference you are creating. This is compulsory as it will throw an error if you don't append it.
--	--	---

```
{% tabs %}
{% tab title="200: OK Success" %}
```

```
```json
{
 "status": 200,
 "success": true,

 "success": false,
 "message": "",
 "data": {}
}
```
```

```
{% endtab %}
```

```
{% tab title="403: Forbidden Wrong/Invalid API Keys" %}
```

```
```
{
 "success": false,
 "message": "Merchant authentication failed",
 "data": {}
}
```
```

```
{% endtab %}
{% endtabs %}
```

Sample Request

```
```postman_json
{
 "transaction_reference": "47484093994949"
}
```
```

Get All Transfers

This API allows you to retrieve the details of all transfers made

`<mark style="color:blue;">`GET`</mark> `https://sandbox-api-d.squadco.com/payout/list``

Query Parameters

| Name | Type | Description | |
|---------|---------|---|--|
| ----- | ----- | | |
| ----- | | | |
| page | Integer | Number of Pages | |
| perPage | Integer | Number of records per page | |
| dir | String | Allows you sort the records in either ascending or descending order. It takes the value "ASC" or "DESC" | |
